

Cypress Semiconductor

198 Champion Court
San Jose, CA 95134

05 June 2008

Subject: PFOS, PFOA and Deca-BDE

Dear Cypress Customer,

This letter is to confirm that Cypress Semiconductor Corporation ("Cypress") products comply with the EU RoHS Directive Amendment 2006/122/EC for Perfluorooctanoic acid (PFOA) and Perfluorooctane sulfonates (PFOS), and the annulment of Deca-brominated biphenyl ether (Deca-BDE) from the EU RoHS Directive 2002/95/EC.

1. Cypress end products are PFOS, PFOA and Deca-BDE free, below 1000 PPM limit
2. Cypress internal factory and subcontractors do not use PFOS, PFOA or Deca-BDE in the assembly and test manufacturing process.
3. PFOS and PFOA are used only in photo resists at wafer fabrication but this is etched away. Reference the above directive, PFOS and PFOA are exempted when used in photo resists.

Furthermore, Cypress has Environmental System Management in place to support this directive as part of RoHS program.
