Sunnyvale, California 94088-3453, USA

June 1, 2010

Obsolescence Notification No: 2795

Subject: **Obsolescence of the pSRAM Type 5, 256M Multi-Chip Packages (MCPs) products listed below**

Spansion LLC is announcing the obsolescence of pSRAM Type 5, 256M, and all valid combinations of the Multi-Chip Packages (MCPs) products listed below. See below for details:

Product Identification: S98WS512PE0HW0150

Package Types: TSA088

Product Line: ESG – Embedded Solutions Group

Reason for Obsolescence: These products are being removed from Spansion's portfolio due to Commercial Die used in the MCPs being obsoleted by the commercial die supplier.

Application Impact: All valid combinations of the products affected will no longer be offered.

Potential Replacement Parts: Since there are no direct replacements of 256M pSRAM available in the market and the closest replacement option would be an MCP with a lower density (128Mb) pSRAM, Spansion will not be offering replacement parts. Contact the factory for further information.

Old Part Final Order Date: November 30th, 2010

Old Part Final Shipment Date: May 30th, 2011

Products Affected By This Change (part numbers):

S98WS512PE0HW0150

Even though the above date projections are based on the most current product development status information at the time this ACN was issued, they are subject to change. For the latest schedule and any other information, please contact your local sales office or your local distributor.
