Thank you for your interest in the CY8CKIT-032 PSoC 4 Analog Front End (AFE) Shield. This document lists kit contents, installation requirements, kit documentation, limitations, and known issues.

Kit Contents
The CY8CKIT-032 PSoC 4 Analog Front End (AFE) Shield includes the following:
- CY8CKIT-032 PSoC 4 Analog Front End (AFE) Shield
- Quick Start Guide

Software and Tools
This kit is intended to be used as a companion to a baseboard containing Arduino Uno R3 compatible headers and I2C master capability. Software for programming the baseboard will depend on the specific baseboard chosen. For example, the CY8CKIT-044 PSoC 4 M-Series Pioneer Kit will require PSoC Creator while the CYW943907AEVAL1F Wi-Fi Evaluation Kit will require WICED® Studio software. The shield has default firmware so no software is required for the kit itself unless the user wants to modify the default operation. In that case, PSoC Creator™ 4.2 or later is necessary.
