Description of change:

This change was initiated to correct a data sheet error on the CY7C1021V33 data sheet dated April 13, 1998, and the CY7C1021V30 data sheet dated October 1997. The Input HIGH Voltage (V_{IH}) for both devices have been changed as follows:

From: 2.0V minimum
To: 2.2V minimum

The CY7C1021V33 and CY7C1021V30 were originally designed to meet the 2.2V minimum V_{IH} and have always been tested to that limit. There has been no change to the device or process. There will be no change to the part number. The revised data sheets can be downloaded from the following links:
